

FOR IMMEDIATE RELEASE

Inductive Wireless Charging presented by INTIS at the IAA 2019 in Frankfurt

Hamburg, 27th of August 2019: Visit the INTIS stand at the IAA, Hall 5 / Booth C02 from the 11th to the 15th of September to get an insight into our cutting-edge inductive charging technology. Have a chat with our experts over a coffee and find out how our WPT solutions can automate energy transfer for your application. With equivalent power transfer and efficiency to CCS stations, INTIS is truly driving inductive charging innovation.

About INTIS:

Founded in Hamburg in December 2011, INTIS is a subsidiary of the high-tech enterprise IABG mbH in Ottobrunn, near Munich. At our branch in Lathen, Emsland, we cater to the growing transport, energy and environmental solutions markets. Our focus is on developing infrastructure solutions for future transport systems and sustainable energy sources. Our strategy is to combine and optimise systems and technology from across the whole IABG family of companies, in order that our customers profit from the combined project experience available to the group.
